why choose Astracast?

Astracast is recognised as a market leader in the manufacture of kitchen sinks, taps and accessories and have been manufacturing stainless steel and composite sinks for 22 years.

INNOVATION, DESIGN AND PERFORMANCE ARE OUR TRADEMARK FEATURES

In order to sustain our position as market leader, we continuously strive to develop products and solutions that lead the field.

With our industry leading team of designers, engineers and craftsmen we inspire and innovate, creating stunning visual and practical solutions for today's homes.

HIGHEST QUALITY

Regardless of the material and model, you can be assured of the highest quality. Our commitment to design and investment in manufacturing has been acknowledged with the award of ISO9001:2000. This international standard reflects high levels of design, development, manufacture and quality assurance, guaranteeing consistent high standards throughout the entire range.

ASTRACAST GUARANTEE

All Astracast sinks have a comprehensive guarantee which covers the sink against the unlikely event of any material or manufacturing defect.
This guarantee is just one part of Astracast's commitment to total quality, assuring you that your Astracast sink will give you the highest level of performance and lasting good looks for years to come.

IMPORTANT: Our obligation under the guarantee is to the original purchaser only – and may not be transferred.

stainless Steel | CERAMIC | GRANITE rok® | rok® METALLIC

NEW pop-up covered waste system

A brand new patented* innovation that will change the look of your sink!

Improve the look of your sink with a covered pop-up waste!

The NEW pop-up covered waste system provides a more contemporary alternative to traditional designs. It has a stainless steel canopy which incorporates an easy-to-use push-up/down mechanism. The internal soft basket membrane is hygienic and easier to clean than standard wastes. The waste system can be fitted to any sink with a standard 90mm aperture.

* Pending in Europe and US.

Ellipse Sink with Pop-up Waste

materials and care

a wide range of material choice

ROK® Metallic is a unique granite material whereby metallic effect particles are added during the manufacturing process. The resulting sink has striking good looks and complements contemporary kitchen environments. Available in three colours with all the material benefits of ROK®.

Granite ROK® sinks are made from the most advanced material used in the manufacture of kitchen sinks. They are designed to combine hard-working performance with stunning good looks and natural textures of granite. With real quartz silica particles and a textured appearance ROK® sinks are available in a variety of natural colours.

Stainless Steel 18/10 sinks offer long lasting corrosion resistance and will withstand all common household acids and detergents. Our range features three stunning finishes, Classic Polished Steel, Linen – with its textured surface that offers stunning looks and durability and Brushed Steel – designed to complement modern appliance finishes.

Ceramic Sinks are individually hand-crafted and finished in fireclay. Cool and silky to touch, they have a hard non-porous surface giving excellent resistance to all commonly used chemicals and detergents and are extremely resistant to heat.

Lincoln Round Bowl with Voyager Tap

Geo 1.5 Bowl with Viceroy Tap

resistance to…

ALL ASTRACAST GRANITE SINKS ARE DESIGNED TO OFFER ULTIMATE MATERIAL PERFORMANCE, YET ARE EASY TO CLEAN AND ARE RESISTANT TO NEARLY ALL HOUSEHOLD CHEMICALS

Resistance to Thermal Shock
Exposure to extreme variations in temperature can sometimes have an adverse effect on the durability of the sink. Astracast sinks are designed and tested to withstand repeated cycles of hot and cold liquids without effect.

Impact and Scratch Resistant
Astracast sinks are designed to resist everyday knocks and bumps in the most hectic kitchen, without chipping or marking. This ensures that the finish of the sink and the cleaning benefits that go with it remain for the products life span.

Resistance to Chemicals
Astracast's materials innovative, molecular, structure ensures that all sinks are resistant to most commonly used household chemicals.

Resistance to Stains
The low material porosity denies staining agents the opportunity to penetrate the surface. Even the worst stains such as red wine and beetroot are easily wiped away with a cloth.

Water and Light Resistance
Astracast's materials are screened by world renowned colour laboratories – to ensure that Astracast sinks will not discolour in direct sunlight or water whiten over time.

Sink Accessories

Grids and Drainers

Wooden Chopping Boards and Colanders

Glass Chopping Boards

Many of our sinks have a wide range of useful and practical sink accessories which help turn your sink into a work centre, ideal for the hygienic preparation of food. **Please refer to the Technical Specifications at the rear of this brochure for full details of the accessories available.**

Feature Sinks

Throughout our brochure please look out for the **Feature Sinks icon** – this indicates a sink which comes with a customised accessory pack as standard.

Designer Packs

Also please look out for the **Designer Packs icon** – this indicates a sink which is available in a Special Promotion Pack which includes useful accessories and a high quality tap.

Please contact us on:
01274 475 160
for a copy of our Designer Pack Brochure.

profile

THE PROFILE SINK IS A UNIQUE ULTRA-MODERN DESIGN INCORPORATING THE LATEST IN SINK INNOVATION

The Profile sink is available in 1.0 and 1.5 bowl variants and left or right-handed versions – with a premium brushed steel finish. With its chamfered edges and unique concealed wastes and overflows, the Profile adds a focal point to any modern kitchen design.

Features

- Unique chamfered edge design to the front and back of the sink enables the sink to complement current appliance trends
- Covered wastes and overflows
- Enclosed drainer with its own overflow, make the sink a practical working area
- Complementary range of accessories available
- Both sinks fit in a 600mm base unit.

bistro

THE BISTRO RANGE OF SIT-ON SINKS COMBINES MODERN DESIGN WITH FUNCTIONAL PRACTICALITY

The Bistro sink is available in 1.0 bowl and 1.5 bowl, left or right handed variants with a Premium Brushed Steel finish. Offering tightly radiused corners and sleek clean contours it makes the Bistro the perfect accompaniment to any modern kitchen environment.

The Bistro is manufactured using Premium 1.2mm thick stainless steel. This is much thicker than standard steel and results in a product that is both innovative and extremely durable.

Features

- Gives the stainless steel bespoke look for a realistic and reasonable price
- Solid sturdy tap deck – ideal for mounting large focal tap designs
- Comes with a range of complementary accessories making it an ideal food preparation area
- 620mm deep sink which is designed to complement oversized appliances and act as a centre-piece to any kitchen
- Sits on a 1000mm base unit.

echo

THE ECHO RANGE OF INSET SINKS COMBINES MODERN DESIGN WITH FUNCTIONAL PRACTICALITY

The Echo range of inset Stainless Steel sinks have been designed to complement the modern kitchen environment. Both 1.0 and 1.5 bowl variants feature large main bowls for washing and soaking of large cookware items. An off-centre tap deck location maximises the working area on the Echo for more efficient food preparation.

Features

- Off-centre tap deck location maximises the working area
- 1.5 bowl has the half bowl offset to the left or right, making it more practical and also giving it a unique look
- Single bowl sink has a large main bowl
- Both sinks have a stylish range of accessories available
- Both sinks feature our unique Aquature™ drainer waste allowing liquids to be drained quickly and efficiently even when the main bowls are in use

VORTEX DRAINER

UNIQUE CONCEALED WASTE AND OVERFLOW COMPLEMENT THE OVERALL CONTEMPORARY LOOK

essenza & onesto

The Essenza and Onesto offer modern solutions and timeless beauty – the perfect complement to a contemporary or traditional setting. The Essenza (sit-in, semi-recessed) provides a spacious main bowl with useful half bowl, whilst the Onesto (inset) provides a half bowl with large, useful run-off drainer.

Features – Essenza

- Manufactured from luxury ceramic fireclay
- Spacious main bowl suitable for washing large non-dishwasher items
- The half bowl is situated at the back of the sink to exploit maximum area for the main bowl.

Features – Onesto

- 1.5 Bowl inset sink with a unique overflow, and run off drainer
- Manufactured from luxury ceramic fireclay
- Left or right handed drainer
- Expansive main bowl makes it suitable for washing large items.
- Minimum base unit: 600mm

jersey & equinox

The Jersey ceramic sink features spacious bowls combined with an elegant wide expanse drainer area. This stunning over-sized fireclay sink is a statement of function and design emanating quality and style.

The Equinox ceramic sinks are hand finished to give excellent quality, depth and texture. Available in both 1.0 and 1.5 bowl variants the Equinox is undoubtedly the most contemporary functional inset ceramic available.

Features – Jersey

- Traditionally styled
- Available in 1.5 bowl only
- Hand finished in high gloss ceramic
- Pop-up waste as standard.

Features – Equinox

- Flexible sink at home in either a modern or traditional kitchen setting
- Hand finished in high gloss ceramic
- Generous bowl make this a practical sink
- Sleek contours and a linear drainer add to the overall clean look of the sink.

edinburgh & aquitaine

THE BOW FRONTED EDINBURGH AND THE CURVACEOUS AQUITAINE ARE MADE FROM HIGH GLOSS CERAMIC FIRECLAY GIVING A STUNNING SMOOTH, CONTEMPORARY FINISH

The bow fronted Edinburgh sink offers an elegant spacious fireclay sink that gives a fresh alternative to timeless classic Belfast.

The Aquitaine combines curvaceous contours with a solid ceramic finish. Available in 1.0 and 1.5 bowl variants.

Features – Edinburgh

- Spacious sink with generous bowl size
- At home in either a modern or traditional setting
- Finished in a stunning high gloss finish

Features – Aquitaine

- Both the 1.0 and 1.5 bowl are reversible
- Solid, curvaceous contours and a defined linear drainer pattern combine to create a sink equally at home in traditional and modern kitchens alike
- Generous bowl and drainer sizes make this sink a practical solution
- Finished in a stunning high gloss finish
- Optional accessories available.

AQUITAINE, DISTINCTIVELY DESIGNED TO OFFER A FRESH, DEFINED STYLING TO A CERAMIC SINK

belfast & butler drainer

THE BUTLER SINKS RANGE FROM ASTRACAST ARE TIMELESS CLASSICS, ELEGANT AND SPACIOUS TO SUIT ANY STYLE KITCHEN

The Belfast sink has become a popular household addition in recent years. Our luxury straight-sided thick walled version is an exact replica of the original Victorian design. The sink has a deep bowl, ideal for larger items, and comes complete with chrome waste and traditional integrated weir overflow.

The Butler Drainer is a superb additional item to the Belfast sink – sitting on top of your worktop it allows you to use it for draining or as an additional preparation area.

Features

- The weir overflow adds to the classic look of the sink
- At home in a traditional kitchen
- Individually hand crafted
- Fits on a standard Belfast sink base cabinet
- Finished in ceramic fireclay
- The Butler Drainer is a practical addition to any Butler sink in the range.

BUTLER DRAINER

THE BELFAST SINK HAS BECOME A POPULAR HOUSEHOLD ADDITION IN RECENT YEARS. OUR LUXURY STRAIGHT-SIDED THICK WALLED VERSION IS AN EXACT REPLICA OF THE ORIGINAL VICTORIAN DESIGN

canterbury & sudbury

Manufactured from Premium Fireclay High Gloss Ceramic the Canterbury is a modern alternative to the traditional styled Belfast sink.

The Sudbury has very clean, angular contours giving a contemporary look which is equally at home in both modern and traditional environments. Available in both single and a large double bowl version for ultimate flexibility.

Both models are capable of handling larger items such as grill pans and woks.

Features – Canterbury

- Modern design based on the traditional Butler style sink
- Straight lines give the sink a distinctly contemporary feel
- Can be installed with all worktop types (including laminate)
- Practical half bowl at the rear of the sink.

Features – Sudbury

- Design at home in either a traditional or contemporary setting
- Large bowl sizes on both sinks make this a practical option
- Clean angular contours.

THE CANTERBURY AND SUDBURY SINKS ARE CLASSIC, TRADITIONAL STYLED SINKS WHICH ARE THE PINNACLE OF FORM AND FUNCTION AND A TALKING POINT OF ANY KITCHEN

echo

NEW POLISHED FINISH

THE ECHO RANGE OF SINKS ARE STUNNING CONTOURED, UNDERMOUNT SINKS WITH EXTRA DEEP BOWLS, FINISHED IN POLISHED STEEL FOR CONTEMPORARY STYLING

The Echo range features modern, minimalist design with highly functional main bowls. Both the S1 and S2 single bowls feature the deepest bowls available for a standard single bowl undermount within the UK – the S2 has a superior bowl width of 510mm.

Four of the five bowl variants (excluding the half bowl) feature main bowl grids as standard to protect the deep main bowls and prolong the sinks Premium Polished Steel finish.

Features

- Stunning mounted in granite and solid surface worktops (not suitable in laminated worktops)
- Ideal for teaming with large feature taps
- Compact, easy clean with radiused corners
- Ideal for island unit application
- Ideal for use with waste disposal units
- All main bowls are deeper than most undermounted sinks on the market (195mm)
- Grid included to protect bowl.

ONLY SUITABLE FOR GRANITE OR SOLID SURFACE WORKTOPS.

onyx

The Onyx Inset/Undermount sinks are manufactured from Premium Brushed Steel and the Inset version can be fitted into any worktop material including laminate – giving the look and feel of a designer sink without the added expense of polishing granite or rounding edges.

Features

- Can be used with granite and solid surface worktops (undermounted) or with laminate worktops (inset)
- Compact, easy clean with radiused corners
- Ideal for compact kitchens where space is limited or for island unit application
- Mix and match between the various bowl configurations to customise the work centre
- Achieve a steamlined undermount look without the need for solid surface worktops (inset)
- Drainer benefits from slimline waste, which allows fitting over appliances such as dishwashers.

FS Feature Sink DP AVAILABLE AS A **DESIGNER PACK**

lincoln

THE LINCOLN RANGE OF CERAMIC UNDERMOUNTS ARE HIGH QUALITY, MODERN AND VERSATILE

The Lincoln range of ceramic fireclay undermounts offers versatile styling within modern kitchen environments. The range features seven dimensional options including half, main, round bowls and round drainers – each manufactured from high quality fireclay with a traditional high gloss finish.

Suited to any solid surface material the Lincoln undermount range can be paired in various configurations to suit all kitchen sizes.

Features

- Stunning contrast when under-mounted in black granite worktops
- Superb white fireclay gloss finish
- Ideal teamed with stainless steel taps
- Easy to clean and maintain
- Sinks sit in 1000mm base units (for combinations of half and main bowl sinks).

Nordic Multi Professional Tap

Taps

FROM THE RUSTIC FARMHOUSE TO THE ULTRA MODERN PENTHOUSE APARTMENT THERE IS A TAP TO COMPLEMENT AND FINISH THE SETTING.

WITH A MYRIAD OF COLOURS, FINISHES AND ADDITIONAL FUNCTIONS, MAKE THIS AN UNPARALLELED FAMILY FROM WHICH TO SELECT YOUR PERFECT TAP

taps to complement your kitchen…

The perfect finishing touch with one of the most important accessories in any kitchen!

Nordic Professional TP0704 – Polished

Astracast's stylish taps are in-line with most kitchen manufacturers gleaming finishes and will complement all kitchen styles – whether city slick, rural chic or country farmhouse, there will be a style of tap available to scintillate all tastes.

Our wide range of taps are available in either:-

Stainless Steel
Professional
Contemporary
Classic
Traditional
and not forgetting…
Springflow® our fantastic water filtration system.

Colour Coding

Throughout this tap section each tap has its own individual colour-coded, key features. The colours aim to make it easier to pick out the features you want when making your choice of tap.

Tap features

- High Pressure
- Med Pressure
- Low Pressure
- Compression
- Single Flow
- Dual Flow
- Quarter Turn
- Pull-Out Directional Spray
- Swivel Body

Design and Innovation

From designer waterfall spouts to ceramic style traditional handles, every detail has been considered on each tap so that no matter what your kitchen style is, there is a tap to match. Our collection collates the taps by style and function which can help guide your choice. Use the colour-coded key features to help identify the features and benefits that would most complement your kitchen.

Understanding tap dimensions

The dimensions of the taps are located in the following technical specifications section, the measurements are in order of tap height, spout reach and spout height.

Water Pressure

When choosing a tap you need to consider the water pressure available in your home. (See operating pressures for each tap in the technical specifications at the back of the brochure). Cold water will be at mains pressure so is not usually a problem*, the pressure at which your hot water comes out the tap is vital and you must note those designs which require a high pressure to perform well.

Water pressure is measured in the unit bar (also termed 'head') which is the distance from a presumed water tank to the tap in height ÷10 (1 bar = 10 metres head of water).
If you have a pressurised water heater system then you will have a minimum amount of pressure (normally 1.8 bar), which is more than adequate to provide good flow through most taps.

If you have an un-pressurised system then you will need to calculate the head of hot water available to you before looking at our recommended minimum operating pressure and making your selection; – taking into consideration the route, any bends or diversions in the pipe work could reduce the pressure. If needed, contact your plumber for professional advice.

Pumps to boost water pressure can be purchased from all good DIY and plumbing retailers, should your tap of choice require a greater pressure than your system offers.

*If you live on a higher floor or your water supply comes from a private supply then check the minimum hot/cold water supply suitability.

For more details on any of our taps please refer to our separate Tap Brochure.

To request a copy please contact us on
Tel: 01274 475 160 or

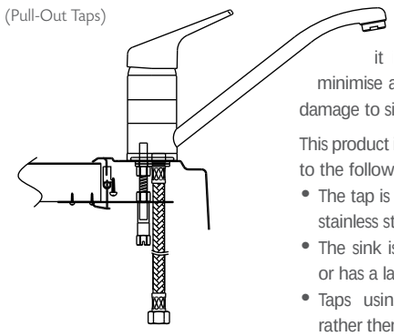
TAP SUPPORT BRACKET

Order code: TP0518
(Standard)

Order code: TP0519
(Pull-Out Taps)



On occasion, depending on the type of sink and weight of the tap being fitted, a tap may require additional support. This product is designed to reduce the amount of sway of the tap when it is being used and to minimise any potential long term damage to sinks, taps or pipe work.

This product is particularly applicable to the following conditions:

- The tap is fitted to a budget inset stainless steel sink.
- The sink is a single bowl model, or has a large drainer section.
- Taps using flexible connectors rather then rigid copper tail pipes.

Professional TP0764 – Polished/Volcano Black

Springflow® pure filtered water

CHOOSE TASTE

Making and keeping water safe means water companies have to use chemicals like chlorine that can significantly affect taste and odour. In addition natural sediment and other non-harmful contaminants can end up making our water taste and look anything but fresh.

Springflow®, however, transforms this into natural fresh tasting and odourless water that is a sheer pleasure to drink!

Springflow® filter taps combat odours and contaminants in your water supply to improve the appearance and taste of tap water, dramatically reducing chlorine by up to 99%.

Your Springflow Filter will reduce:

- **Chlorine**
- **Pesticides**
- **Solvents**
- **Sediment**
- **Dirt**
- **Rust**

To give you fresh, crystal clear natural tasting filtered water in your own home.

CHOOSE HEALTH

Water is an essential component of life. We can't live without it.

In the UK we take it for granted that we have safe drinking water on tap. Springflow® goes even further; combating herbicides, pesticides, insecticides and other organic chemicals – making it not just taste better but healthier too!

CHOOSE SPRINGFLOW®

You can't choose the quality or source of your tap water, but with a Springflow® filter tap you can transform your normal mains supply into fresh, natural tasting filtered water – at the touch of a handle.

Springflow® filter taps give additional protection against chemicals that may be present in the mains supply, reducing chlorine by up to 99% and filtering out sediment, dirt and rust whilst leaving the minerals essential to good health.

At the turn of a handle Springflow® taps dispense an endless supply of refreshing crystal clear water, it couldn't be easier!

CHOOSE SIMPLICITY

Our patented valve system means there is no need for additional handles or fuss – just push the cold handles back to dispense fresh filtered water.

Our filter, hidden away under the sink can be mounted in any position, horizontal or vertical – to best fit the space you have to offer. When it comes to changing the filter you don't need a new unit just open up the discreet casing and pop in a new cartridge. No mess, no hassle, just great tasting water.

- Springflow® enhances the taste of soft drinks, tea, coffee and even food,when used for cooking.
- Springflow® reduces the build-up of lime scale extending the life of appliances including kettles.
- Springflow® treats up to 2,500 litres of water, around six months use, with just one cartridge.

CHOOSE ECONOMY

A typical bottle of water would cost up to 30 x more than Springflow® filtered water, and with Springflow® there is no plastic waste.

CHOOSE DESIGN...

Our current range features a tap for every kitchen. (see next page)
